D. Summary of my Activities and Future Plans

My experience as a practitioner for twenty five years in the field prior to entering the academic world has had a profound influence on my scientific work. Studying the process that students go through in their academic studies while trying to optimize, improve and modify this process has been the guideline of my scientific work. My research focuses on two particular areas - International Social Work and Religion , Spirituality & Social work.

In the international arena my research has focused on how to prepare students to the challenges that await them in the international arena and study the process they go through while training in field work abroad

The other area of research that I have begun to explore is religion and spirituality, both of which are becoming more important to the profession.

Research that is in process- My research is focused today on Religion & academia in addition to International social work.
